CIVO

VMwary?

A fast exit route for Service Providers

After Broadcom's acquisition of VMware, many Service Providers are facing vast increases in licensing costs and are unsure about future updates and development, leading to a re-evaluation of their commitment to VMware.

Introducing:
CivoStack Enterprise for Service Providers

CivoStack Enterprise is a complete software solution for Service Providers, including CSPs, MSPs, data centers, and Telcos, enabling you to quickly swap your VMware environments for an advanced, white-label platform.

On-prem white label solution
Enjoy fast and straightforward installation designed for deployment in your data center and compatible with your hardware.

Up to 80% cheaper than Broadcom
Enjoy a straightforward VRAM consumption licensing model, achieving up to 80% savings compared to Broadcom costs.

Long term price commitment
CivoStack Enterprise ensures long-term financial clarity with a guaranteed price commitment, safeguarding against unexpected hikes.

Proven technology

✓ **Live migration** support for VMs ensures seamless transitions with zero downtime.

✓ **High availability** options ensure robust service reliability and fault tolerance.

✓ **Multi-tenancy** support enables efficient resource utilization and isolation, perfect for Service Providers and large-scale environments.

A simple migration path

CivoStack Enterprise provides a hassle-free migration path from VMware, allowing you to simply take your .vmdk files and import them with ease, complemented by free migration assistance to ensure a smooth and straightforward transition.

CIVO

An easy path off VMware

With feature rich support
